Winston Scott was a NASA astronaut who made two flights on the US Space Shuttle. He has written this book as a personal reflection of the obstacles in his life which he overcame to become an astronaut.

If you want to understand how to make it sometimes against the odds this is the book. It would be good for a teenager who wants to be inspired. It is the first time Apogee has done an autobiography and I hope it will not be the last. It has many excellent colour photos.
