from Gazelle, Falcon House, Queen Square, Lancaster LA1 1RN, 2003, 128pp, £14.95, (US \$19.95), ISBN 1-896522-94-7.

During each Apollo mission attention was focused on the astronauts, with their marvellous spacecraft impinging on the public's awareness only at take-off and splashdown. But during all the days of each mission the Apollo Command and Service Modules performed faithfully and almost flawlessly, 24 hours a day, keeping three men alive and comfortable, maintaining communications and monitoring themselves, as well as the astronauts, the Earth and the Moon.

With this book for the first time the

public can become acquainted with the Apollo spacecraft in detail and learn the story of its design and construction. Full colour renderings in exacting detail provide an array of views of the Command and Service Modules complete with details of construction and fabrication.

This is an informative book with very good clear illustrations. It gives an excellent visual record of the spacecraft and launch vehicle. Space enthusiasts will want a copy of this book on their reference bookshelves.
